

Collector Cone

SPECIFICATION

Technical Specification

Dimensions	Width 300mm Height 390mm Depth 300mm
Material	Aluminium
Mounting	Backplate mounting onto Unistrut

Compatibility

Sensor Compatibility	SGM595 Gas Sensor
----------------------	-------------------

FEATURES

- For lighter than air gases only
- Enhances target flow over sensor head
- Lightweight, robust design
- Simple installation
- Aluminium construction

APPLICATION

The Duomo Gas collector cone is designed to enhance the flow of target gases - e.g. Natural gas - with a specific gravity < 1 over a sensor head. SGM595 sensor pictured.

The collector cones are usually fitted where ceiling mounting is problematic or gas appliances and pipework are widely spaced.

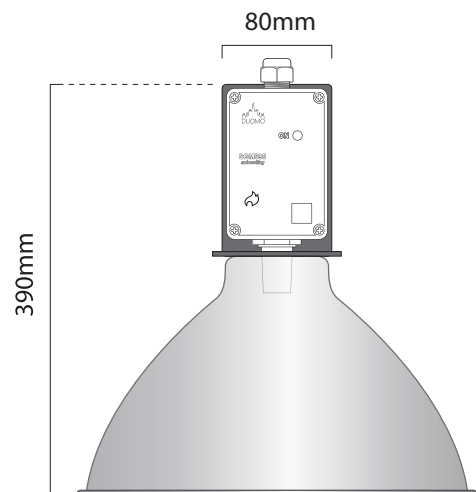

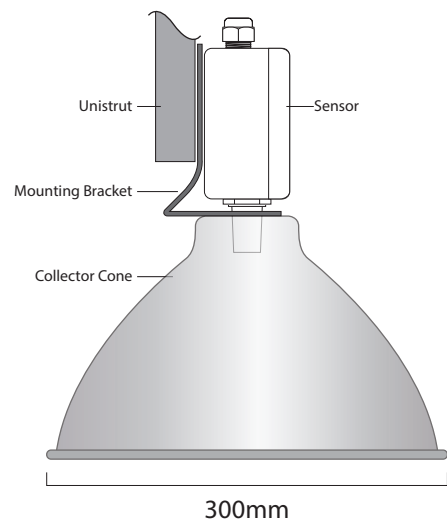

Furthermore, any area where the potential leakage source can be clearly identified.

INSTALLATION

Mount the collector cone directly onto Unistrut, through the sensor housing and the holes in the collector cone backplate.

For guidance regarding location and suitability for specific applications please call Duomo Technical department on 01905 797989.

Overall Dimensions (mm)

IMPORTANT: Collector cone is designed for lighter than air gases only.
